Hi Anthony,

1. Does the ACC layout meet the need and purpose (justification) of the project? (Read the need and purpose from the approved concept report)

The ACC layout performs at lower level of service (LOS) then the LOS/Delay Summary Table from the Need & Purpose Statement in the Approved Concept. The Approved Concept Need & Purpose Statement also notes eliminating conflict points due to accident rates. The AAC layout will not eliminate conflict points since the project does not include the Southbound Loop Ramp and the concrete median between the West Mall Entrance Road and Huntington Road. These two items do contradict the Need & Purpose Statement but they may not be critical items in meeting the needs and purpose of the project. This needs consultation with environmental SME.

2. Does the layout meet logical termini criteria?

The limits of the project are reduced with the ACC layout, but it may still meet the logical termini criteria. This needs consultation with traffic and environmental SME.

We would still like to meet with you to discuss strategies for moving the project forward.

Thanks,

Shawn C. Fleet, P.E., Heath & Lineback Engineers, Inc.

Shawn,

Can you please provide a summary that speaks more specifically to the two questions below? Call with questions or concerns.

Thanks,

Anthony Tate

Well you tell me. Are you able to answer the following questions now;

1. Does the ACC layout meet the need and purpose (justification) of the project? (Read the need and purpose from the approved concept report)
2. Does the layout meet logical termini criteria?

You don't think the added conclusion section is sufficient?

Gentlemen,

I have uploaded to the GDOT SCP FTP site the revised traffic study memo per your comments to improve the Summary/Conclusion (See page 15). Please forward to the appropriate personnel for review.

Upload location: /ProgramDelivery/Uploads/122890

We would still like to meet with you to discuss strategies for moving the project forward. Also, Let me know if you have additional comments.

Thanks,

Shawn C. Fleet, P.E., Heath & Lineback Engineers, Inc.

Good morning Anthony,

Please find attached the traffic study memo for the project. Please forward to the appropriate personnel for review. Bayne Smith and Brent Cook were involved in the meetings with us and when Athens Clarke County was proposing the reduced project scope.

The results are not what Athens Clarke County will be expecting so these findings may have some political implications. We would like to meet with you to discuss strategies for moving the project forward.

Regards,
